

Yuvraj Singh

Backend & AI Engineer | Distributed Systems • Microservices • High-Scale Reliability (1M+ users)

 Portfolio  GitHub  Yuvraj Singh  devyuvraj88@gmail.com  +91 7701928602

EXPERIENCE

ZS | BACKEND ENGINEER

Dec 2025 – Present | Gurugram, India

- Developed backend microservices for the Kural AI Analytics Platform, delivering 5+ end-to-end features from API design to production deployment.
- Refactored large-scale data ingestion pipelines from Pandas to Polars, achieving a 7x increase in processing speed and reducing memory overhead by 40%.
- Enhanced system observability using structured logging and centralized error handling, improving system reliability and reducing production troubleshooting time by 30%.
- Designed and maintained resilient microservices for high-throughput data pipelines, ensuring fault tolerance and high availability.
- Utilized Factory and Adapter design patterns to consolidate divergent code branches, reducing codebase duplication by 60%.

HAWKMARTECH | BACKEND & AI ENGINEER (SDE-I)

Dec 2024 – Nov 2025 | Gurugram, India

- Architected REST and GraphQL APIs for high-traffic platforms (One Turf News), supporting a user base of 1M+ with low-latency, high-availability microservices architecture.
- Optimized database queries and implemented indexing, query optimization, and Redis caching, resulting in a 90% reduction in API latency (from 1.2s to <100ms).
- Built an agentic RAG-based GenAI system using LangChain and n8n to automate 80% of real-time cricket commentary and content generation.
- Trained and fine-tuned a Llama-based model, reducing AI generation costs by 80%.
- Built systems for near real-time data processing using asynchronous workflows and caching strategies.

PROJECTS

PC MSIT | PLACEMENT CELL AUTOMATION PLATFORM | MERN STACK, MATERIAL UI, FIREBASE

- Live Demo • Source Code **Apr 2024**
- Built a centralized platform for 400+ students to manage job applications, leading to a 50% faster recruitment notification cycle.
- Designed an RBAC-driven admin dashboard allowing TnP officials to filter 1000+ applications by custom eligibility criteria in seconds.
- Implemented end-to-end recruitment flows with job states, application filtering and automated status updates.
- Login Credentials: Enrollment number: 00815007722 Password:12345678

EASILY FAMOUS | AI-POWERED CONTENT PLATFORM | NEXT.JS, TYPESCRIPT, NODE.JS, LLM

- Live Demo • Source Code **Jul 2024**
- Engineered a GenAI content engine using custom LangChain prompts, increasing user content creation speed by 3x.
- Integrated Google Analytics to track user behavior and derive actionable data insights.
- Designed secure backend APIs with Express.js, including rate-limiting, session handling and optimized DB operations.

TECHNICAL SKILLS

LANGUAGES

• Python • JavaScript • Java

BACKEND & GENAI

• FastAPI • Node.js • MongoDB • SQL • Redis • REST • GraphQL • Distributed Systems • Microservices • Docker • CI/CD • Pandas • Polars • VectorDBs • LangChain • LangGraph • RAG • n8n

FRONTEND & WEB

• React.js • Tailwind CSS • HTML • CSS • Git & GitHub

COURSEWORK

DSA • OOPS • DBMS • OS • CN • SDLC

SOFT SKILLS

Problem-solving • Leadership • Teamwork

EDUCATION

GGSIU

B.TECH, INFORMATION TECHNOLOGY

Oct 2022 - Jul 2025

CGPA: 8.1 / 10.0

DSEU

DIPLOMA, COMPUTER ENGINEERING

Aug 2019 - Jul 2022

Aggregate: 85.7%

INTERESTS

- Reading
- Athletics
- Football
- Cricket
